- 24/7 onsite support for breakdown
- Remote monitoring

Site Requirements

Access

The units will be delivered onsite with a 4x4, and can be positioned on grass or hard standing. Height access of a minimum of 3.7 meters is required, and the final position should be reasonably level.

Connectivity

Although our units have large header tanks, a water supply with good pressure is required. Waste can be piped into a nearby drain or soakaway. We supply 10 meters of fresh water and waste pipe per unit as standard. A 13 or 16 amp mains electricity supply is required per trailer.

Site Checklist

- ✓ Site Height Access 3.7m
- ✓ Reasonably Level Ground
- ✓ 13/16 amp Power (10m)
- ✓ Freshwater Supply (10m)
- ✓ Drain or Soakaway (10m)

We can supply extra pipework and are used to solving problems, so if your site does not meet any of these requirements please let us know, we are here to help.

Fresh Water Tanks & Pumps

Waste Water Tanks & Pumps

Awesome Clients

'We always use & highly recommend Basecamp for all our 3rd party shower supplies. When our customers need a shower unit, Dave always provides us with exceptional service & the units he provides are top notch! Zero hassle!'
